📍 Hyderabad

SUMMARY

I am a dedicated Full Stack Developer with expertise in JavaScript, ReactJS, React Native, Django, HTML, and CSS. I have a strong foundation in both frontend and backend technologies, coupled with experience in cloud platforms such as AWS and GCP. I am passionate about creating innovative solutions that enhance user experiences and drive impactful results. I thrive on challenging projects and collaborating with talented teams to deliver high-quality products.

EXPERIENCE

Software Engineer

BayRock Labs

📅 10/2025 Present 📍 Remote

Bayrock Labs is a technology solutions company specializing in scalable, data-driven, and AI-powered software for global clients.

- **AI Assest Management Tools** Backend & API Development – Worked on production-grade backend services, REST APIs, and integrations using Python, FastAPI, and scalable database solutions

Full-Stack Python Developer

Fin Infocom PVT LTD

📅 10/2024 10/2025 📍 Hyderabad

FIN Infocom is a renowned offshore development services provider committed to helping organizations accomplish their objectives.

- **POS Enterprise Panel** Contributed to the development of an advanced Point of Sale (POS) system designed for businesses to streamline their operations, manage inventory, process transactions, and generate real-time reports.
- **Security Enhancements** Led the effort to secure AWS Lambda APIs, ensuring secure communication and data handling. Implemented authentication and authorization mechanisms using AWS IAM roles and policies, reducing security risks across the platform.
- **Performance Optimization** Spearheaded performance improvements in the POS platform by analyzing bottlenecks and optimizing AWS resource utilization, resulting in faster transaction processing and enhanced system scalability under heavy loads.

Full-Stack Developer

KozyKreativeConceptsPvt Ltd

📅 05/2023 10/2024 📍 Hyderabad

kkreative is a leading web design and development company, dedicated to providing businesses of all sizes with high-quality, custom-built websites that help them succeed online.

- **OptionPerks Algorithmic Trading Website)** Designed and developed **OptionPerks**, an algorithmic trading platform that uses advanced trading algorithms to analyze real-time financial data and execute trades. Worked on integrating data feeds, designing the front-end UI, and developing backend services for automated trade execution based on user strategies. This platform allowed users to monitor market conditions and execute trades with minimal latency.
- **Medical Consultancy Platform** Led the development of an online medical consultancy website where users could access professional medical advice remotely. Implemented features such as appointment scheduling, real-time consultations through video conferencing, and a secure database for storing medical histories and prescriptions.
- **Full-Stack Development** Utilized technologies like React, Node.js, Django, and PostgreSQL to develop both front-end and back-end systems for seamless user interactions and secure data management. Integrated third-party APIs to enable real-time tracking and secure communication between users and medical professionals.

KEY ACHIEVEMENTS

- ★ **Led Developer Team**
Led a Developer Team to successfully deploy 5 cloud-based applications within 2 years
- ★ **Boosted User Engagement**
Boosted user engagement of mobile app by implementing innovative UI designs and features
- ★ **Built End to End Softwares**
Built end-to-end software solutions, covering everything from UI design to deployment and post-launch support
- ★ **Deployment Automation**
Automated deployment pipeline for faster, more reliable releases, reducing manual intervention and errors

SKILLS

HTML	CSS	Ajax	JavaScript
React	React Native	PHP	
WordPress	Python	Django	AWS
C/C	GCP	IAM	Jenkins
AI/ML	Sonar	VPS	CI/CD
DOCKER			

EDUCATION

Bachelor of Computer

Applications(BCA)

NIIS Institute of Business Administration IIBA

📅 10/2018 09/2021 📍 Bhubaneswar

- Gained foundational knowledge in **C**, **Java**, and **Python** programming languages during college.
- Focused on **basic concepts** such as data structures, algorithms, and object-oriented programming.
- Developed hands-on projects and assignments that enhanced problem-solving and coding skills in these languages.
